## ASTRONOMY

Contributions from the Lick Observatory and also from the Department of Astronomy of Berkeley (Students' Observatory) are published in two series, *Publications of the Lick Observatory* and *Lick Observatory Bulletin*, under the editorial direction of ROBERT G. AITKEN, Associate Director of the Lick Observatory. Larger monographic contributions appear in the *Publications*, which are issued as a rule in complete volumes only. ## BOTANY\*

Edited, 1924-25, by RICHARD M. HOLMAN, Assistant Professor of Botany, and W. A. SETCHELL, Professor of Botany. Special studies of inheritance and related problems based on tobacco hybrids, and of other problems of plant physiology, based on California species of *Trillium*, are to be found in volumes 5 and 7 of this series and may be continued into later volumes. Other studies in volume 7 give an account of a rubber plant survey of western North America. Volumes 1 to 4, 6, and 10 contain miscellaneous papers, with some emphasis on algae, particularly of the Pacific Coast, on fungi, and on the systematic botany of California. Volume 8 comprises a systematic classification of the marine algae of the Pacific Coast and will eventually contain some 2000 pages and about 300 plates. Volume 9 is a report on the boreal flora of the Sierra Nevada. Volume 11 resumes the studies on tobacco hybrids, and Volume 12 deals with the flora of the island of Tahiti.

Price per volume, for volumes 1 to 4, \$3.50; volume 5, \$6; for other volumes (except volume 8), \$5.

Names of authors are given in full in the "Index of Authors."
